REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose a controller adjusting a temperature of the substrate based on a **pigment** type of the ink ejected by the ink ejection elements.

U.S. 5,477,246 to Hirabayashi et al. discloses setting operating temperature based on a print mode used (see figs. 4 and 5). Hirabayashi et al. does not use pigment inks, further the temperature is based on the print mode, not the type or color of ink.

U.S. 4,791,435 to Smith et al. discloses control of temperature based on type of ink. Smith et al. specifically mentions dye ink (column 2, line 11).

U.S. 5,175,565 to Ishinaga et al. also does not teach control of temperature with pigment based inks.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
